

FIG. 1

Fig. 1 is a block diagram of a control system. A central block labeled "Main controlling loop selector" (13) is connected to four "Input to output connection controller" blocks (A, B, C, D) on the left and four "Preset changing main controller" blocks (1, 2, 3, 4) on the right. A dashed line labeled "12" connects the input controllers to the selector, and another dashed line labeled "30" connects the preset controllers to the selector.
